

REMOTE PATIENT MONITORING

Care continues beyond the hospital.

SmartOptz connects home vital sign readings to care teams through its Neo Telehealth Gateway and RPM portal.

ABOUT SMARTOPTZ

SmartOptz is a Malaysian digital health company developing connected care technology for monitoring patients at home. Its remote patient monitoring solution is designed to help healthcare providers follow patients after discharge, support chronic disease programs and extend care into the home.

HOW THE SOLUTION WORKS

01 MEASURE

Patients take readings using compatible Bluetooth medical devices.

02 CONNECT

Neo receives the readings and uploads them through an internet connection.

03 REVIEW

The RPM portal presents readings to care teams; EMR integration is available by project.

THE SMARTOPTZ RPM ECOSYSTEM

Neo Gateway

Bluetooth capture, multi-user support and an interactive display.

SmartNeo app

Home setup and patient data sharing.

RPM portal

A central view of patient readings for care teams.

HealthKit options

Devices and connectivity configured for program needs.
